SUMMARY

Front-End Developer, 3+ years of hands-on work with React, Next.js and TypeScript, the last 2.5+ of them in product teams. Most of my work is product UI: forms and multi-step flows, state and data layers, keeping the app fast and the codebase clean. Before frontend I spent 10 years in SEO, so I know why Core Web Vitals, SSR/SSG and rendering choices matter for search, not just in theory.

SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & libraries: React, Next.js, Zustand, TanStack Query, React Hook Form, Zod, Formik, i18n

UI & styling: Tailwind CSS, SCSS / SASS, Chakra UI, MUI (Material UI), styled-components, Storybook, responsive and accessible layouts

Testing & tooling: Vitest, ESLint, Git, GitHub

Integration & data: REST API, Firebase, CometChat

AI tools: Claude Code, Claude Cowork, Gemini

EXPERIENCE

Front-End Developer - Records Marine, Remote — Dec 2024 - Present

B2B marketplace for the maritime industry: company directory with search and filters, RFQ flows, vendor dashboards, subscription checkout and company verification.

- Build the core product flows in Next.js and TypeScript.
- Optimize frontend performance and page load speed.
- Migrated the app from Chakra UI v2 to v3 and from Next.js 14 to 16.
- Refactor older parts of the codebase, fix bugs, review colleagues' PRs; take part in technical planning and task estimation.
- Set up Claude Code for the project: wrote CLAUDE.md instructions and custom skills for the team. Use it day to day for version migrations, refactoring, Vitest tests, Storybook stories and docs, tracing bugs from stack traces.
- Day-to-day stack: Zustand for state, TanStack Query for data, React Hook Form + Zod for forms, Chakra UI, Storybook, Vitest, i18n, CometChat for in-app chat.

Junior Front-End Developer - Miteyda, Remote — Feb 2024 - Nov 2024

No-code website builder (under NDA): users assemble and publish their own sites from blocks and templates.

- Worked on the editor itself: block settings panels, live preview, drag-and-drop layout, with React, TypeScript, Next.js, MUI, SCSS and styled-components.
- Took part in rendering of published sites in Next.js: turning saved page data into fast, SEO-friendly pages.
- Turned Figma designs into reusable editor components; worked closely with designers and backend developers, connected REST APIs.

Junior Front-End Developer - Baza Trainee Ukraine, Remote — Apr 2023 - Feb 2024

Web projects for non-profits and social initiatives, built by small volunteer teams for real users.

- Made responsive, accessible layouts with HTML5, CSS3, SCSS and Tailwind CSS; wrote React / TypeScript components.
- Set up CI/CD pipelines and deployed the sites myself.
- Led a group of 2-3 frontend developers on two projects at once; sped up pages with lazy loading and lighter assets.

Head of SEO / SEO Team Lead / SEO Specialist - Devellar, Hexa LLC — 2014 - 2022

- 10 years in SEO, from specialist to Head of SEO. This is where my habit of caring about Core Web Vitals, crawlability and SEO-friendly rendering comes from.

PROJECTS

Chytozavryk - app that gets kids to read through quizzes; parent, child and admin dashboards. Next.js, TypeScript, SCSS, React Query, Formik. github.com/lanina90/chytozavrik-frontend

StatusAC - website for a law firm with appointment booking and an admin panel for content. React, styled-components. github.com/lanina90/advokato

EDUCATION

Front-End Developer course - CyberBionic Systematics, Dec 2022 - May 2023

Master's degree, Foreign Economic Activities - Lviv Polytechnic National University, 2008 - 2013

LANGUAGES

English - B2 (Upper-Intermediate) **Ukrainian** - Native
